MY QUESTION IS.....

YOUR RECOMMENDED USE OF THE XENADRINE RFA PILL IS 12 WEEKS, WHAT I WANTED TO KNOW IS WOULD IT BE HARMFUL TO USE THE PILL FOR THE 12 WEEKS THEN STOP USAGE AND THEN CONTINUE AGAIN 2 MONTHS LATER FOR 6 WEEKS. I AM ASKING BECAUSE I AM NOW EXPERIENCEING RAPID HEART RATE, NAUSEA, HEADACHES, AND DIZZINESS. I'VE STOPPED CONSUMING THE PILL FOR ABOUT FOUR WEEKS AND I STILL FILL THE SYMPTOMS FROM TIME TO TIME. I WENT TO A DOCTOR AND I WAS TOLD THAT I AM NOW GOING THROUGH WITHDRAWALS, BUT I AM STILL GONNA GO SEE A CARDIO MD. PLEASE GET BACK TO ME AS SOON AS POSSIBLE.

Xenadrine

I received your email about your medical condition. I hope you are feeling better and find the cause. I have the name and phone number of a medical doctor you can call for advice. His name is Dr. Colker and he can be reached at 203-625-9608. Also, discontinue use of anything you think may be contributing to your condition. If you have any questions, please call me at 732-292-4600. Please follow label instructions carefully on Xenadrine. Thank you.
